Thank you Eron, the revised FCR-04 is approved. I will sign and return the document when I am back from the field and at my computer this evening.

Hi Madi,

Thanks so much. Please see attached revised FCR-04. We added the following sentence: "However, if a sheen or NAPL is encountered, regardless of depth interval, the soil will be containerized for proper disposal."

Please let me know if you have any questions. Thanks!

Thank you Eron, and sorry for the delay.

EPA approves FCR-05.

For FCR-04, would you please revise to include text that indicates that if you encounter sheen or NAPL that

you will containerize the material for disposal?

Thank you,  
Madi

Hi Madi,

As we discussed, attached are FCR-04 (Abandonment of Riverbank Boreholes Performed using Post-Hole Digger) and FCR-05 (Riverbank Soil Sample Intervals and Repeat Boring Attempts).

Please let me know if you have any questions or comments. Thanks!
